

Functional Requirements (NFR) Specification

1. Candidate Registration and Profile Management

FR ID	EPIC	User Story	Acceptance Criteria
FR-01	Candidate Registration	As a Candidate , I want to register using my email address and password so that I can securely access the platform.	Ensure the Candidate is able to: - Register using a valid email address - Create a secure password - Receive successful registration confirmation
FR-02	Candidate Login & Logout	As a Candidate , I want to securely log in and log out so that I can access my personalized dashboard.	Ensure the Candidate is able to: - Log in using registered credentials - Access the candidate dashboard - Securely log out of the platform
FR-03	Candidate Password Recovery	As a Candidate , I want to reset my password through email verification so that I can recover access to my account, if I forget my password.	Ensure the Candidate is able to: - Request a password reset - Receive a verification email - Create a new password successfully
FR-04	Candidate Profile Management	As a Candidate , I want to create and manage my personal profile so that recruiters can view my latest information during the recruitment process	Ensure the Candidate is able to: - Create a personal profile - Edit profile information - Save updated profile details
FR-05	Candidate Qualification Management	As a Candidate , I want to update my education, skills, certifications, projects, and work experience so that my profile always reflects my latest qualifications	Ensure the Candidate is able to: - Add educational qualifications - Update technical and soft skills - Manage projects and certifications - Add or edit work experience - Save updated information
FR-06	Resume Upload	As a Candidate , I want to upload my resume in PDF or DOCX format so that the system can analyze it using AI.	Ensure the Candidate is able to: - upload a resume in PDF or DOCX format receive upload confirmation - view the uploaded resume

FR-07	Resume Cloud Storage	As a Candidate , I want my uploaded resume to be securely stored in cloud storage so that my personal information remains safe and accessible whenever required.	Ensure the Candidate is able to: - securely store uploaded resumes - retrieve uploaded resumes whenever required - prevent unauthorized access to resumes
FR-08	Resume Version Management	As a Candidate , I want to replace or delete my uploaded resume so that I can maintain the latest version of my resume.	Ensure the Candidate is able to: - Replace an existing resume - Delete an uploaded resume - upload a new version successfully

2. Recruiter Registration and Profile Management

FR ID	EPIC	User Story	Acceptance Criteria
FR-09	Recruiter Registration	As a Recruiter , I want to register using my official company email and company details so that I can access the recruitment platform.	Ensure the Recruiter is able to: - Register using valid company details. - Provide an official company email address. - Receive successful registration confirmation.
FR-10	Recruiter Authentication	As a Recruiter , I want my account to be authenticated before accessing the platform so that only verified recruiters can use the system.	Ensure the Recruiter is able to: - Verify the registered email address. - Access the system only after successful authentication. - Receive appropriate authentication status messages.
FR-11	Recruiter Profile Management	As a Recruiter , I want to update my company profile so that candidates can view the latest company information	Ensure the Recruiter is able to: - View the recruiter dashboard after login. - Access job postings and applications.
FR-12	Recruiter Dashboard	As a Recruiter , I want to access a personalized dashboard so that I can efficiently manage job postings and candidate applications.	Ensure the Recruiter is able to: - Create a personal profile - Edit profile information - Save updated profile details

3. Administrator Management

FR ID	EPIC	User Story	Acceptance Criteria
FR-13	Candidate Account Administration	As a Placement Administrator , I want to manage candidate accounts so that I can maintain accurate student records.	Ensure the Administrator is able to: • View candidate accounts. • Edit candidate information when required. • Activate or deactivate candidate accounts.
FR-14	Recruiter Account Administration	As a Placement Administrator , I want to manage recruiter accounts so that only authorized recruiters can access the platform.	Ensure the Administrator is able to: • View recruiter accounts. • Verify recruiter information. • Approve or remove recruiter accounts.
FR-15	Job Posting Administration	As a Placement Administrator , I want to monitor all job postings so that only valid job opportunities are available to candidates.	Ensure the Administrator is able to: • View all job postings. • Monitor recruiter activities. • Remove invalid or inappropriate job postings when necessary.
FR-16	Placement Activity Reporting	As a Placement Administrator , I want to generate reports on placement activities and user statistics so that I can monitor the overall performance of the platform.	Ensure the Administrator is able to: • Generate placement reports. • View user statistics. • Export reports for future reference

4. Resume Upload and Parsing

FR ID	EPIC	User Story	Acceptance Criteria
FR-17	Resume Document Processing	As a Candidate , I want to upload my resume in PDF or DOCX format so that the system can process my resume for analysis.	Ensure the Candidate is able to: • Upload resumes in PDF or DOCX format. • Receive confirmation after successful upload. • View the uploaded resume.

FR-18	Resume Information Extraction	As a Candidate , I want the system to automatically extract information from my uploaded resume so that I do not need to enter my details manually.	Ensure the Candidate is able to: - Automatically extract resume information. - View extracted personal and professional details. - Verify the extracted information.
FR-19	Resume Qualification Identification	As a Candidate , I want the system to identify my education, skills, experience, projects, and certifications so that my profile is generated accurately.	Ensure the Candidate is able to: - View extracted educational qualifications. - View identified skills and experience. - View projects and certifications extracted from the resume.
FR-20	Parsed Resume Data Storage	As a Candidate , I want my parsed resume information to be stored securely so that I can access it whenever required.	Ensure the Candidate is able to: - Store parsed resume details securely. - Retrieve resume information. - Update stored resume information when required.

5. ATS Resume Evaluation

FR ID	EPIC	User Story	Acceptance Criteria
FR-21	ATS Score Generation	As a Candidate , I want to receive an ATS score for my resume so that I can evaluate its compatibility with recruitment systems	Ensure the Candidate is able to: - View the generated ATS score. - Understand the overall resume evaluation. - Access ATS score whenever required.
FR-22	Resume Quality Evaluation	As a Candidate , I want my resume to be evaluated based on formatting, skills, education, experience, and keywords so that I know its strengths and weakness.	Ensure the Candidate is able to: - View evaluation based on resume sections. - Identify missing or weak areas. - Receive detailed resume assessment

FR-23	ATS Score Improvement	As a Candidate , I want to receive suggestions for improving my ATS score so that I can increase my chances of getting shortlisted	Ensure the Candidate is able to: • Receive AI-generated improvement suggestions. • Identify resume weaknesses. • Improve ATS compatibility.
FR-24	Resume Keyword Analysis	As a Candidate , I want the system to highlight missing keywords from a selected job description so that I can customize my resume accordingly.	Ensure the Candidate is able to: • Receive personalized improvement suggestions. • Improve resume based on AI recommendations. • Increase Resume Match Score for future applications

6. Resume and Job Description Matching

FR ID	EPIC	User Story	Acceptance Criteria
FR-25	Resume Job Description Comparison	As a Candidate , I want my resume to be compared with a selected job description so that I can determine my suitability for the role.	Ensure the Candidate is able to: • Compare resume with job description. • View comparison results. • Understand overall compatibility.
FR-26	Resume Match Scoring	As a Candidate , I want to receive a Resume Match Score so that I can evaluate how well my resume matches the selected job	Ensure the Candidate is able to: • View Resume Match Score. • Understand matching percentage. • Compare scores for different job descriptions
FR-27	Job Skill Gap Identification	As a Candidate , I want the system to identify missing skills required for the selected job so that I can improve my qualifications.	Ensure the Candidate is able to: • View missing technical skills. • View missing soft skills. • Identify areas for improvement
FR-28	Resume Match Recommendations	As a Candidate , I want to receive AI-generated recommendations to improve my Resume Match Score so that I can better align my resume with the job requirements.	Ensure the Candidate is able to: • Receive personalized improvement suggestions. • Improve resume based on AI recommendations. • Increase Resume Match Score for future applications

7. Job Posting

FR ID	EPIC	User Story	Acceptance Criteria
FR-29	Job Creation & Publishing	As a Recruiter , I want to create and publish job postings so that eligible candidates can apply for available positions.	Ensure the Recruiter is able to: • Create a new job posting. • Enter job title, description, and eligibility criteria. • Publish the job successfully.
FR-30	Job Posting Modification	As a Recruiter , I want to edit or remove job postings so that I can keep job information accurate and up to date.	Ensure the Recruiter is able to: • Edit existing job postings. • Update job details. • Delete inactive or expired job postings.
FR-31	Job Description Data Storage	As a Recruiter , I want the system to store job descriptions securely so that they can be accessed and managed whenever required.	Ensure the Recruiter is able to: • Store job descriptions in the database. • Retrieve job details. • Maintain job records securely.
FR-32	Job Classification	As a Recruiter , I want to categorize job postings based on skills, location, and experience level so that candidates can easily find relevant jobs.	Ensure the Recruiter is able to: • Categorize jobs by required skills. • Specify job location. • Define experience level and job category.

8. Job Search and Application

FR ID	EPIC	User Story	Acceptance Criteria
FR-33	Job Opportunity Browsing	As a Candidate , I want to browse available job opportunities so that I can identify suitable positions based on my qualifications.	Ensure the Candidate is able to: • Search jobs using keywords. • Apply filters for skills, location, and company. • View filtered job results accurately.
FR-34	Job Search & Filtering	As a Candidate , I want to search and filter jobs based on skills, location, and company so that I can quickly find relevant opportunities.	Ensure the Candidate is able to: • Search jobs using keywords. • Apply filters for skills, location, and company. • View filtered job results accurately.

FR-35	Job Application Submission	As a Candidate , I want to apply for jobs using my uploaded resume so that I can complete the application process quickly.	Ensure the Candidate is able to: • Select a job to apply for. • Submit the application using the uploaded resume. • Receive confirmation after successful application submission
FR-36	Application History Tracking	As a Candidate , I want the system to maintain my job application history so that I can track the jobs I have applied for.	Ensure the Candidate is able to: • View previously applied jobs. • Check the application status. • Access complete application history whenever required

9. Interview Question Generation

FR ID	EPIC	User Story	Acceptance Criteria
FR-37	Job-Specific Interview Generation	As a Candidate , I want the system to generate interview questions based on the selected job description so that I can prepare for the specific role.	Ensure the Candidate is able to: • Select a job description. • Generate AI-based interview questions. • View personalized interview questions.
FR-38	Interview Question Categorization	As a Candidate , I want the system to generate technical, HR, and behaviour interview questions so that I can prepare for different stages of the interview process.	Ensure the Candidate is able to: • View technical interview questions. • View HR interview questions. • View behaviour interview questions.
FR-39	Personalized Interview Preparation	As a Candidate , I want personalized interview questions based on my skills and experience so that I can focus on improving my weak areas.	Ensure the Candidate is able to: • Generate interview questions based on the uploaded resume • Receive roles specific interview questions. • Practice personalized interview questions.

10. Mock Interview

FR ID	EPIC	User Story	Acceptance Criteria
FR-40	AI Mock Interview	As a Candidate , I want to participate in an AI-powered mock interview so that I can simulate a real interview experience	Ensure the Candidate is able to: • Start a mock interview session. • Answer AI-generated questions by typing response. • Complete the interview successfully.
FR-41	Interview Response Recording	As a Candidate , I want the system to record my interview responses so that my performance can be evaluated later	Ensure the Candidate is able to: • Submit responses during the mock interview. • Store interview responses securely. • Review submitted responses if required
FR-42	Mock Interview Feedback	As a Candidate , I want to receive AI-generated feedback after completing the mock interview so that I can improve my interview performance.	Ensure the Candidate is able to: • View AI-generated feedback. • Identify strengths and improvement areas. • Review suggestions to improve future interview performance.
FR-43	Interview Performance Scoring	As a Candidate , I want to view my overall interview performance score so that I can measure my interview readiness and track my progress over time.	Ensure the Candidate is able to: • View overall mock interview performance score. • Monitor progress across multiple mock interviews sessions. • Understand readiness for actual interviews.

11. AI Candidate Ranking

FR ID	EPIC	User Story	Acceptance Criteria
FR-44	Candidate Ranking	As a Recruiter , I want the system to rank applicants based on their Resume Match Score so that I can quickly identify the most suitable candidates.	Ensure the Recruiter is able to: • View candidates ranked according to Resume Match Score. • Compare candidate rankings. • Identify the most suitable applicants.
FR-45	Candidate ATS Evaluation	As a Recruiter , I want to view the ATS score of each candidate along with their ranking so that I can evaluate resume quality before shortlisting candidates.	Ensure the Recruiter is able to: • View ATS scores for each candidate. • Compare ATS scores among applicants. • Use ATS scores during candidate evaluation.
FR-46	AI Candidate Profile Summary	As a Recruiter , I want the system to provide AI-generated summaries of candidate profiles so that I can quickly understand each applicant's qualifications and suitability.	Ensure the Recruiter is able to: • View AI-generated candidate summaries. • Review candidate skills, education, and experience. • Use summaries to support recruitment decisions.
FR-47	Candidate Shortlisting & Rejection	As a Recruiter , I want to shortlist or reject candidates based on AI recommendations and my evaluation so that I can efficiently manage the recruitment process.	Ensure the Recruiter is able to: • Shortlist suitable candidates. • Reject unsuitable candidates. • Update candidate application status successfully.

12. Dashboard and Reports

FR ID	EPIC	User Story	Acceptance Criteria
FR-48	Candidate Progress Dashboard	As a Candidate , I want to access a personalized dashboard so that I can monitor my ATS score, job applications, and interview preparation progress.	Ensure the Candidate is able to: • View ATS score and resume analysis results. • View applied job history and application status. • Access interview preparation progress and recommendations.
FR-49	Recruiter Operations Dashboard	As a Recruiter , I want to access a recruiter dashboard so that I can manage job posting, monitor applications, and review shortlisted candidates.	Ensure the Recruiter is able to: • View active and inactive job postings. • Monitor candidate applications for each job. • Access shortlisted
FR-50	Placement Administration Dashboard	As a Placement Administrator , I want to access an administrator dashboard so that I can monitor users, job postings, and overall platform activities	Ensure the Administrator is able to: • View candidate and recruiter information. • Monitor job postings and recruitment activities. • Access overall system statistics and platform usage.
FR-51	Recruitment Analytics & Reporting	As a Placement Administrator , I want to generate placement and recruitment analytics reports so that I can evaluate recruitment performance and support decision-making.	Ensure the Administrator is able to: • Generate placement and recruitment reports. • View placement statistics and analytics. • Export reports for future reference and analysis.

Non-Functional Requirements (NFR) Specification

1. General System Requirements

NFR ID	EPIC	User Story	Acceptance Criteria
NFR-01	Standard Operation Response Performance	As a Candidate , I want standard system operations such as authentication, profile management, and dashboard loading to be completed within five seconds so that I can use the platform efficiently.	Ensure the Candidate is able to: • Submit requests successfully. • Receive system responses within 5 seconds under normal operating conditions. • Continue navigation without noticeable delay.
NFR-02	Resume Upload Performance	As a Candidate , I want my resume to be uploaded within 15 seconds so that I can quickly proceed with resume analysis and job applications.	Ensure the Candidate is able to: • Upload resumes successfully. • Complete resume uploads within 15 seconds under normal network conditions. • Receive confirmation after successful upload.
NFR-03	AI Resume Analysis Performance	As a Candidate , I want the AI-generated ATS score and resume analysis to be displayed within 30 seconds so that I can quickly evaluate my resume	Ensure the Candidate is able to: • Submit a resume for ATS scoring and analysis. • Receive the ATS score and analysis results within 30 seconds. • View resume evaluation results without unnecessary delay.
NFR-04	Job Search Performance	As a Candidate , I want job search results to be displayed within 7 seconds so that I can efficiently browse and apply for relevant opportunities.	Ensure the Candidate is able to: • Perform job searches successfully. • Receive search results within 7 seconds. • Browse available jobs without performance issues.
NFR-05	System Scalability	As a User , I want the system to support simultaneous users so that all users can	Ensure the User is able to: • Have the system support concurrent users during peak-load testing.

NFR ID	EPIC	User Story	Acceptance Criteria
		access the platform without unacceptable performance degradation.	• Perform normal operations without interruptions. • Experience the agreed response-time targets being maintained while users are active.
NFR-06	Application Scalability	As a System Administrator , I want the application architecture to support future expansion so that new AI modules and user roles can be added without major system modifications.	Ensure the System Administrator is able to: • Integrate additional AI modules. • Add new user roles. • Extend the application without affecting existing functionalities.
NFR-07	Database Scalability	As a Database Administrator , I want the database to support increasing volumes of resumes, job postings, and applications so that the system continues to perform efficiently as data grows.	Ensure the Database Administrator is able to: • Store increasing volumes of application data. • Retrieve records efficiently. • Maintain database performance as data grows, up to [defined project capacity target].
NFR-08	System Availability	As a User , I want the platform to be available whenever required, except during scheduled maintenance, so that I can access recruitment services reliably.	Ensure the User is able to: • Rely on the system targeting at least 99% availability, excluding scheduled maintenance. • Receive advance communication of scheduled maintenance.
NFR-09	Maintenance Notification	As a User , I want to receive advance notification about scheduled maintenance so that I can plan my activities without interruption.	Ensure the User is able to: • Receive maintenance notifications in advance. • Know the maintenance schedule before downtime begins. • Plan platform usage accordingly.
NFR-10	User Authentication	As a User , I want to securely authenticate using JWT-based authentication so that I can safely access my account and protect my personal information.	Ensure the User is able to: • Log in using valid credentials. • Receive secure authentication through JWT.

NFR ID	EPIC	User Story	Acceptance Criteria
			• Access the system only after successful authentication

2. User Authentication, Access Control & Data Security

NFR ID	EPIC	User Story	Acceptance Criteria
NFR-11	Role-Based Access Control	As a System Administrator , I want the system to enforce role-based access control so that Candidates, Recruiters, and Administrators can access only their authorized features.	Ensure the System Administrator is able to: • Assign appropriate roles to users. • Restrict unauthorized access to system features. • Ensure each user accesses only role-specific functionalities.
NFR-12	Password Security	As a User , I want my password to be securely hashed so that my account remains protected from unauthorized access.	Ensure the User is able to: • Have passwords stored using a secure one-way hashing method. • Rely on plain-text passwords never being stored. • Log in securely using their password.
NFR-13	Secure Communication	As a User , I want all communication between the client and the server to use HTTPS so that my personal and recruitment data is transmitted securely.	Ensure the User is able to: • Access the application over a secure HTTPS connection. • Exchange data securely with the server. • Use all application features without insecure communication.
NFR-14	Secure Data Storage	As a Candidate , I want my personal information and account data to be stored securely so that my confidential information remains protected from unauthorized access.	Ensure the Candidate is able to: • Have personal information stored securely (e.g., encrypted at rest). • Retrieve stored information without compromising data security. • Trust that stored data is protected against unauthorized access.

NFR ID	EPIC	User Story	Acceptance Criteria
NFR-15	Data Access Control	As a User , I want only authorized users to access personal and recruitment data so that my confidential information is protected from unauthorized viewing or modification.	Ensure the User is able to: • Access only authorized information. • Prevent unauthorized users from viewing personal data. • Maintain confidentiality of recruitment-related information.
NFR-16	System Reliability	As a Recruiter , I want the system to provide consistent and accurate job matching and candidate ranking results so that I can confidently evaluate and shortlist suitable candidates.	Ensure the Recruiter is able to: • Obtain accurate job matching recommendations. • View reliable ATS scores and candidate rankings. • Trust that matching results remain consistent for similar candidate profiles.

3. System Reliability & Error Handling

NFR ID	EPIC	User Story	Acceptance Criteria
NFR-17	Failure Recovery	As a User , I want the application to recover gracefully from unexpected failures without losing my data so that I can continue my work with minimal interruption.	Ensure the User is able to: • Resume system usage after unexpected failures. • Retain previously saved data without loss. • Continue ongoing activities after system recovery.
NFR-18	Error Handling	As a User , I want the system to display clear error messages without exposing sensitive system information so that I can understand the issue while maintaining application security.	Ensure the User is able to: • Receive clear and understandable error messages. • Identify issues without confusion. • Trust that sensitive system information is not displayed in error messages.
NFR-19	User Interface Design	As a User , I want the system to provide a simple and intuitive user interface so that I	Ensure the User is able to: • Navigate the application easily. • Understand interface elements without

NFR ID	EPIC	User Story	Acceptance Criteria
		can easily interact with the application and complete my tasks without confusion.	difficulty. • Complete tasks using a simple and intuitive interface.

4. Usability & Interface Design

NFR ID	EPIC	User Story	Acceptance Criteria
NFR-20	Responsive Design	As a User , I want the application to support responsive design across desktops, tablets, and mobile devices so that I can access the platform from any device conveniently.	Ensure the User is able to: • Access the application on desktop, tablet, and mobile devices. • View content correctly on different screen sizes. • Perform all major functions consistently across supported devices.
NFR-21	Consistent Navigation	As a User , I want navigation to remain consistent across all modules so that I can easily locate features and perform tasks without relearning the interface	Ensure the User is able to: • Navigate between modules consistently. • Locate menus and features easily. • Perform tasks without confusion due to interface inconsistencies.
NFR-22	Ease of Learning	As a User , I want to complete major tasks with minimal training so that I can efficiently use the platform without requiring extensive guidance.	Ensure the User is able to: • Complete essential tasks independently. • Understand system functionality with minimal training. • Use the application efficiently without continuous assistance.
NFR-23	Modular Architecture	As a System Administrator , I want the application to follow a modular software architecture so that individual modules can be developed, maintained, and upgraded independently without affecting the overall system..	Ensure the System Administrator is able to: • Manage application modules independently. • Update or replace modules without affecting other components.

NFR ID	EPIC	User Story	Acceptance Criteria
			• Maintain system stability during module modifications.

5. Maintainability & Software Architecture

NFR ID	EPIC	User Story	Acceptance Criteria
NFR-24	Code Documentation and Organization	As a System Administrator , I want the application to follow a modular software architecture so that individual modules can be developed, maintained, and upgraded independently without affecting the overall system.	Ensure the System Administrator is able to: • Manage application modules independently. • Update or replace modules without affecting other components. • Maintain system stability during module modifications.
NFR-25	Feature Enhancement	As a System Administrator , I want new features to be added without affecting existing functionalities so that the application can evolve while maintaining system stability.	Ensure the System Administrator is able to: • Integrate new features successfully. • Preserve existing functionalities after updates. • Verify system stability following feature enhancements.
NFR-26	RESTful API Design	As a Developer , I want the APIs to follow RESTful standards so that the application components can communicate efficiently, consistently, and securely.	Ensure the Developer is able to: • Develop APIs following RESTful principles. • Enable seamless communication between frontend and backend. • Maintain consistent and standardized API interactions.
NFR-27	Browser Compatibility	As a User , I want the application to support modern web browsers such as Google Chrome, Mozilla Firefox, Microsoft Edge, and Safari so that I can access the platform seamlessly using my preferred browser.	Ensure the User is able to: • Access the application using Google Chrome, Mozilla Firefox, Microsoft Edge, and Safari. • Experience consistent functionality

NFR ID	EPIC	User Story	Acceptance Criteria
			across supported browsers. • Perform all major system operations without browser-related issues.

6. Compatibility

NFR ID	EPIC	User Story	Acceptance Criteria
NFR-28	Cross-Platform Compatibility	As a User , I want the application to be compatible with Windows, Linux, Android, and macOS through a web browser so that I can use the platform regardless of my operating system or device.	Ensure the User is able to: • Access the application from Windows, Linux, Android, and macOS devices. • Use all major features consistently across supported operating systems. • Experience reliable performance without platform-specific compatibility issues.
NFR-29	Database Backup	As a User , I want cross-platform access and regular database backups so that I can use the system reliably and prevent data loss.	• Access the application from Windows, Linux, Android, and macOS devices. • Use all major features consistently across supported operating systems. • Experience reliable performance without platform-specific compatibility issues.

7. Data Backup & Recovery

NFR ID	EPIC	User Story	Acceptance Criteria
NFR-30	Data Recovery	As a System Administrator , I want the system to restore application data after unexpected failures so that users can continue	Ensure the System Administrator is able to: • Restore application data successfully after system failures. • Minimize data loss during the recovery

NFR ID	EPIC	User Story	Acceptance Criteria
		using the platform with minimal data loss and downtime.	process. Resume normal system operations after recovery.
NFR-31	Secure Cloud Storage	As a Candidate , I want my uploaded resumes to be securely stored in cloud-based storage so that my documents remain safe, accessible, and protected from unauthorized access.	Ensure the Candidate is able to: - Upload resumes securely to cloud storage. - Retrieve uploaded resumes whenever required. - Ensure uploaded documents are protected from unauthorized access.
NFR-32	Cloud Deployment	As a User , I want the application to be deployed on cloud platforms so that I can securely access the system from anywhere with an internet connection.	Ensure the User is able to: - Access the application through a cloud-hosted environment. - Use the system without installation on a local machine. - Experience reliable access to the application from different locations.

8. Deployment, Monitoring & Availability

NFR ID	EPIC	User Story	Acceptance Criteria
NFR-33	System Monitoring and Logging	As a System Administrator , I want the system to support continuous monitoring and logging so that I can detect issues, monitor performance, and troubleshoot problems effectively.	Ensure the System Administrator is able to: - Monitor system performance continuously. - View application logs for troubleshooting. - Identify and respond to system issues efficiently.
NFR-34	Seamless System Updates	As a User , I want future updates to be deployed with minimal service interruption so that I can continue using the application with little or no disruption.	Ensure the User is able to: - Continue accessing the application during scheduled updates whenever possible. - Experience minimal downtime during system upgrades.

NFR ID	EPIC	User Story	Acceptance Criteria
			• Use the latest features after updates without affecting existing functionalities. • Use the latest features after updates without affecting existing functionalities..
NFR-35	Purpose-Specific Data Collection	As a User , I want my personal information to be collected only for recruitment purposes so that my data is used appropriately and not for unrelated activities.	Ensure the User is able to: • Provide only the information required for recruitment. • Understand that collected data is used solely for recruitment purposes. • Trust that personal information is not used for unauthorized purposes.

9. Privacy & Confidentiality

NFR ID	EPIC	User Story	Acceptance Criteria
NFR-36	Personal Data Privacy	As a User , I want my personal information to remain private so that it is not shared with third parties or unauthorized users without my consent.	Ensure the User is able to: • Prevent personal data from being shared with third parties without consent. • Control what information is disclosed outside the platform. • Trust that privacy is maintained throughout the recruitment process.
NFR-37	Recruiter Data Access Control	As a Candidate , I want recruiters to access only my information related to job applications so that my personal data remains secure and relevant to the recruitment process.	Ensure the Candidate is able to: • Share only job application-related information with recruiters. • Restrict recruiters from accessing unrelated personal data. • Maintain controlled access to candidate information
NFR-38	AI-Based ATS Scoring	As a Candidate , I want the AI module to generate an ATS score based on my resume and the selected job requirements so that I	Ensure the Candidate is able to: • Upload a resume for AI evaluation. • Receive an ATS score based on resume

NFR ID	EPIC	User Story	Acceptance Criteria
		can evaluate how well my resume matches the job and improve my chances of being shortlisted.	content and job requirements. • View ATS results accurately for the selected job.

10. AI Module Requirements

NFR ID	EPIC	User Story	Acceptance Criteria
NFR-39	Personalized Interview Question Generation	As a Candidate , I want the system to generate personalized interview questions using the uploaded job description so that I can prepare effectively for the specific role.	Ensure the Candidate is able to: • Upload or select a job description. • Receive personalized interview questions relevant to the job role. • Use the generated questions for interview preparation.
NFR-40	AI Response Performance	As a Candidate , I want AI-generated recommendations to be presented within 20 seconds under normal conditions so that I can receive timely feedback without unnecessary waiting.	Ensure the Candidate is able to: • Submit a resume for AI analysis. • Receive AI-generated recommendations within 20 seconds under normal operating conditions. • Continue using the application without significant delays.
NFR-41	AI Recommendation Consistency	As a Candidate , I want the AI module to produce consistent results for similar inputs and improve my resume and interview preparation so that I can trust the recommendations.	Ensure the Candidate is able to: • Receive consistent AI-generated outputs for similar resume inputs. • Obtain meaningful resume improvement suggestions. • Receive relevant interview preparation recommendations based on resume analysis.
